This Agreement constitutes the entire Agreement between the BREEDER and the BUYER with respect to the sale of this PUPPY. Any alterations to this Agreement must be mutual, written, signed and dated.

HEALTHY PUPPY GUARANTEE

Blue Star Labradoodles (BREEDER) strives to provide healthy, sound pups with great temperaments by breeding only healthy dams and sires, and by providing the PUPPY with a quality, veterinarian approved organic diet, exercise, socialization and veterinary care.

Said PUPPY has received all age-appropriate shots and vaccinations. A record of the vaccination history of the PUPPY is supplied to the BUYER at the time of the delivery of the PUPPY.

BREEDER guarantees all puppies against life threatening or quality of life-compromising disease or an obvious debilitating congenital or genetic defect for two (2) years from the date of the PUPPY'S birth. This period is considered adequate time for a gene based illness to present itself. The above-described PUPPY is free of communicable disease and free of obvious and genetic defects at the time of the sale.

In the event a genetic defect is discovered, BREEDER DOES NOT require the return of the puppy in order to receive a replacement puppy. BREEDER does not expect a good pet owner to relinquish a beloved pet. However, if a PUPPY from BREEDER is found to have a genetic defect, as defined below, the PUPPY must be spayed or neutered (if not already altered). In addition, BUYER must exercise good judgment in conjunction with advice of BUYER'S Veterinarian, and put the PUPPY down if the defect is severe enough to cause the PUPPY considerable pain or significantly diminish the PUPPY'S quality of life.

If the PUPPY should be diagnosed with a listed genetic defect within the first two (2) years of life, BREEDER will provide a replacement PUPPY of the same sex and quality from the next available litter or the litter of the BUYER'S choice. A replacement PUPPY will only be granted after the affected PUPPY has been spayed/neutered (if not already altered). The BREEDER is not responsible for any costs associated with diagnosis and treatment of genetic disease or defect.

The BREEDER reserves the right to have the PUPPY examined by a second veterinarian of the BREEDER'S choice at the expense of the BUYER, for the purpose of a second opinion regarding any claims under this HEALTHY PUPPY GUARANTEE. In the case of hip dysplasia, the claim must be accompanied by a statement from the Orthopedic Foundation for Animals (OFA) or a board-certified veterinary orthopedic specialist confirming that the PUPPY does have moderate to severe dysplastic hip joints. In the case of PRA (Progressive Retinal Atrophy) the claim must be accompanied by a statement from a board certified veterinary ophthalmologist stating that the PUPPY has been diagnosed with PRA.

Claims against this GUARANTEE must be accompanied by a statement from BUYER'S veterinarian on the veterinary clinic's letterhead, accompanied by a copy of the receipt from BUYER'S original "New Puppy Vet Visit" to be considered valid. This HEALTHY PUPPY GUARANTEE is not transferable and is valid only for the original BUYER.

To activate this HEALTHY PUPPY GUARANTEE, BUYER must have the PUPPY examined by BUYER'S Veterinarian within three (3) days of physical possession (New Puppy Vet Visit). Failure by the BUYER to have the PUPPY examined within the above mentioned time frame voids the Agreement and Guarantee in it's entirety and frees the BREEDER from any further responsibility towards the health of said puppy.

If the PUPPY is found by the BUYER'S veterinarian to be unhealthy, but not suffering from a life-threatening or quality of life-compromising disease or an obvious or debilitating congenital or genetic defect, the BUYER'S veterinarian is to contact the BREEDER, or the BREEDER'S veterinarian (upon BREEDER'S request) to discuss necessary treatment and allocation of payment of expenses. The BREEDER will reimburse the cost of any medications deemed necessary and agreed upon to restore the PUPPY to health, to include IV re-hydration therapy, but BREEDER will not reimburse any exam, diagnostic fees or hospitalization costs, which are the responsibility of the BUYER, unless agreed to prior to administration. Fax authorization or e-mail is deemed acceptable. Depending upon the extent or severity of the illness, BREEDER reserves the right to replace the PUPPY.

If during the New Puppy Vet Vist, the PUPPY is found by the BUYER'S veterinarian to suffer from a life-threatening or quality of life-compromising disease or an obvious or debilitating congenital or genetic defect, the PUPPY will be returned to the BREEDER immediately, and the purchase price refunded or, at the BREEDER'S discretion, a replacement PUPPY (of equal value) will be provided. BREEDER will pay no treatment costs for congenital defects if BUYER chooses to keep the PUPPY. Deadline for the implementation of this refund /exchange is 30 days from receipt of pup.

Unless the PUPPY is being purchased for breeding, BREEDER will spayed or neuter the PUPPY at no cost to the BUYER prior to the BUYER taking possession of the PUPPY and after the BUYER has signed the Contract of Sale and paid for the PUPPY. BREEDER will also provide the applicable Registration Applications and/or Pedigree at time of delivery.

BUYER is to provide their new PUPPY with annual examinations, vaccinations, heartworm test, and any other reasonable and usual procedures necessary to assure good health. In addition, BUYER agrees to appropriately treat any illness or injury to the PUPPY that may occur in order to maintain the PUPPY'S good health. Failure to properly vaccinate the PUPPY may result in severe illness and death from preventable diseases and constitutes gross negligence on the part of the owner.

There are many factors that can influence the PUPPY'S growth and development. The BUYER assumes the responsibility of continuing the PUPPY'S vaccination schedule, and a good feeding and exercise schedule to keep their PUPPY healthy and fit. The BUYER agrees to provide a suitable fenced area for this puppy.

If, at any time, the BUYER cannot take proper care of the PUPPY, the BUYER must contact the BREEDER. The BREEDER will have the first opportunity to either take the PUPPY back or assist the BUYER in finding a suitable home for the PUPPY
